

THE WORLD OVER

REHABILITATION OF WILD FOWL AREAS PLANNED

WINNIPEG — Rehabilitation of duck breeding area of Canada along lakes similar to a United States undertaking is proposed by Ducks Unlimited (Canada), incorporation of which was disclosed Thursday in the Canada Gazette.

Ducks Unlimited plans to spend \$5,000,000 in a five-year program to "increase and perpetuate the supply of wild ducks and other migratory Canada."

waterfowl within the Dominion of W.G. Ross, Moose Jaw member of the Saskatchewan legislature and a director of the company, said at the annual meeting of the Manitoba Game and Fish Association that the program would be tied in with the prairie farm rehabilitation plan.

Ducks Unlimited was described as a non-profit organization formed to work with the prairie provincial governments and with the farms rehabilitation commission. Its purpose is not to create private reserves from which the public could be excluded but to collect \$5,000,000 for increasing the permanent water surface of the prairie provinces and to restore what has been destroyed by waterfowl.

Canadian directors are Mr. Ross, O. Leigh Spencer, Calgary; James A. Richardson, Winnipeg; and S. S. Holden, Ottawa. Four United States directors will be chosen from four regions into which the country has been divided for the Ducks Unlimited fund-raising campaign.

Cost of organization about \$20,000 is to be paid by Moose Game Birds in America Foundation.

The weather still remains wintry and while a few warm days have occurred recently, the snow is taking a long time to go.

REDUCED MOTOR LICENSE RATES NEXT OCTOBER

Thousands of motor car owners in Alberta are now obtaining their new number plates for the license year which opens on April 1, instead of on January 1, as in past years.

The new plates, which bear the colors of black on an orange background, are good until March 31, 1935.

Thus Alberta joins various other provinces and many of the states in advancing the license year, something that was strongly advocated by the Alberta Motor Association.

Under the new regulation, not announced by the Provincial Secretary, the first reduction on motor licenses will take effect next October 1. Those taking out the 1935-36 license at that time will be given a 40 per cent cut in the yearly rate. Their license, of course, will be good until the following March 31.

For those who turn in their number plates on December 31 next upon declining to take their license out of service at that time, there will be a 20 per cent rebate on the annual license fee. In the case of those who may have just bought cars, and wish to operate them during January, February and March, they will be granted a permit for this purpose on the first day of the quarter of the annual license fee.

CARBON MAN STABBED

Thursday night Alex Looney of Carbon, his face ghastly grey from loss of blood, staggered through the main streets of Drumheller to the R.C.M.P. barracks and dropped exhausted on the steps of a building. When revived, Looney declared that he had been the victim of a vicious knife attack, charged that Alex Kotona was the culprit. Constables Mott and Rasmussen rushed Looney to Drumheller hospital where the victim again fainted, helped Dr. L.F. Brogren to close many gashes on face and neck. Leaving the hospital the two constables travelled to Rosedale, discovered Kotona alone in a badly cut up condition, the tendon of the right thumb being severed down to the wrist with open cuts on the face. Kotona was brought to Dr. Brogren's office, given emergency treatment and then turned over to Chief Constable John Duncan of the city police on a charge of inflicting bodily harm on Drumheller Police Officer.

OIL BEING SOUGHT IN MANY SECTIONS OF THE PROVINCE

With the striking of crude oil in Turner Valley and the Taber field, together with a partial return to prosperity, many companies are seeking oil in new fields throughout Alberta. Recently 14,720 acres ten miles east of Cardston were filed on as well as the following selected lands: 8,900 acres five miles east of Cardston; 10,473 acres 35 miles south of Hanna; 31,700 acres in the Carbon area; 10,080 acres 30 miles west of Carmanagay; 30,680 acres five miles west of Lindross; 10,880 acres 40 miles northeast of Brooks; 240 acres 25 miles northeast of Medicine Hat; and 10,000 acres ten miles southwest of Wainwright.

It is known that somewhere in Alberta there must be a huge body of crude oil and with development in all parts of the province this summer, it is probable that some trace of the huge reserve may be located.

UNITED CHURCH Y.P.S. HAVE ENJOYABLE MEET

The Y.P.S. of the Carbon United Church held their monthly meeting in the church annex on Tuesday night. Members of the Acme society were to have attended the meeting, but owing to the condition of the roads, they did not come.

It was decided to continue the meetings during the months of May and June.

Miss Grace Cameron, Cyril Poxon and John Evans were appointed to arrange a program for the next meeting to be held the first Tuesday in May unless the committee decides otherwise.

Rev. MacDonald continued his discussion on "A Life Worth Sharing," and following this all went to the manse where lunch was served.

LITTLE ITEMS OF LOCAL INTEREST

Wilfred Poxon, who is attending the University at Edmonton, spent a couple of days in town last week, returning to the capital city on Sunday.

Mr. and Mrs. McCrady, Herb, Wilbur and Raymond were Drumheller visitors on Sunday.

Miss Nellie Walker spent the week end holiday in Calgary and returned Monday evening.

Mr. R. C. Downey and four daughters arrived in Carbon on Tuesday. Mr. Downey is the new manager of the Bank of Montreal.

Miss Alice Lacombe returned Monday from a visit to her home in Calgary.

Sheep Thrives of the Granary

Gas-mask is a term with which, unfortunately, all are familiar in this enlightened age, and it might be expected that, in the interests of humanity, those who engage in grain threshing operations on farms where the practice of treating seed against smut is neglected should be supplied with gas masks. This is no joke, as any who have known the headaches and hangovers, caused by the pungent, penetrating smut-infecting dust, can testify. But smut dust, while disagreeable enough in itself, is evidence of still more serious trouble—the theft of real money from the farmer's pocket.

Presenting the Smuts

Smut belongs to the disreputable family of Ustilaginae. There are several members, each one a dirty thief. Bunt or stinking smut is the opprobrious common name of one which preys on wheat; another is the covered smut of barley; there are so susceptible for the smut of oats, while utillago maydis sneaks up on corn.

Railroader-Actor

Roy Emerson (above), English actor who played Macbeth, the railway contractor, in the "Canadian" British epic of Canadian Pacific Railway construction through the Rockies, "Silent but Deadly," found himself at home in the part when he went to the U.S. R. R. mountain division on location. The division was to make a new line to Emerson who with his brother Percy served the railway there in 1912, Roy and Percy as a round-house hostler at Revelstoke, where some of the film's local color was taken. Roy Emerson was a popular figure during the filming of the Canadian railway epic among the railroaders, many of them former associates.

Mr. W. Baird and niece, Miss Sadie Morris, left Monday for Sedro Woolley, Washington, where they will reside.

Born, to Mr. and Mrs. R. Heath, on Monday, March 31, a daughter.

WEEKLY COMMENT ON THE WORLD OF WHEAT BY H. C. L. STRANGE

Since the dawn of agriculture, the dreaded black rust, like a giant scythe has, from time to time, remorselessly cut down the farmers' fields of wheat.

In 1935, after several years of distressing drought, Manitoba and Saskatchewan had the promise, at last, of a bumper crop. Thirty, forty and fifty bushels to the acre were the words on everybody's lips. Alas! the rust expert in and the fine promise of a bountiful crop became a mockery. The horns of plenty was ruthlessly snatched from the very grasp of the expectant farmer.

Mr. H. Liljeqvist, of Ansonia, Manitoba, however, had a crop of good red spring wheat that matured untroubled by the rust. It was Thresher, a new rust-resistant variety, under development since 1907 by the Minnesota Agricultural Experiment Station. The Manitoba Government purchased Mr. Liljeqvist's crop and distributed the seed, as far as it would go, to Manitoba farmers.

There was, however, none available for Saskatchewan. So, with the encouragement of the Dominion Department of Agriculture, the "Iron Testing Plant" imported from Minnesota all the highest quality Registered Thresher available from their best seed growers. Nine carloads were brought in and distributed at cost to some two thousand farmers in Saskatchewan and Manitoba.

The following factors have tended to raise price: Intensive demand for wheat by certain European countries continues unabated. Soviet Spring sowings considerably behind schedule. Wheat crop in the Orient expected to be below last year. Drought affects rice crop in French Indo-China. Siamese rice surplus for export smallest in five years.

The following factors have tended to lower price: Favorable weather in the United States winter wheat belt. Beneficial rains over in Australia. Corn prospects in Argentine good. Egyptian corn yield above average. General rains assure good cereal germination in Palestine. U.S.A. total wheat acreage may be 60 million.

Invoking Ceres

While there is no proof that supplications to Ceres, the goddess of grain, ever brought direct benefits to agriculture, she has given us the name Ceres for these crops. The Cerean to describe the organic mercury dust now employed so successfully in treating seed grain in the prevention of smuts. Treatment with the organic mercury dust does more than this. By promoting germination, it increases yield and in cereal diseases has been shown effective in controlling the germs of root-rot. No farmer should neglect the treatment of his seed, when the cost is only about one cent an acre, and there is no investment more profitable.

S. N. WRIGHT TO HOLD COMMUNITY SALE APRIL 7

S. N. Wright, local auctioneer, has announced that he will hold a community auction sale at the rear of his Implement warehouse commencing at 1:30 o'clock on Wednesday, April 7th. Any person who has articles to sell is asked to list them with Mr. Wright before the sale commences.

RED BUS LINES LTD. LOSE THREE BUSES IN THE DRUMHELLER FIRE

Worst Fire in the History of Settlement of Drumheller

Red Bus Lines, which had its origin in Carbon, later moving its head office to Drumheller, suffered a serious loss on Saturday night when their office building and garage was burnt to the ground along with the Valley Motors, and the Wheelhouse Hotel buildings.

The fire, started from an explosion in the workshop of the Valley Motors and quickly spread to the adjoining buildings of the Red Bus Lines Ltd., where only the office fixtures could be saved.

Loss of the Red Bus Lines was said to run close to \$15,000. It included three buses and all garage equipment, including stock and supplies.

Loss of the bus company was covered largely by insurance, although the other buildings burned in the \$200,000 fire were only partly insured against fire. Included in this were about 25 cars in the Valley Motors, five of which were New Nash models on display.

The Red Bus Lines has opened up a temporary office two doors from their old stand in Drumheller and although handicapped for transportation vehicles, are running to schedule.

BOY SCOUT NEWS NOTES

BY THE S. M.

Lighting a Fire Without Matches (Continued from last week)

When you are on a "shike" and intend to do some cooking, take your fire, pet fire, and a small tin of the black "tin" in your haversack.

To make a fire, first make a kind of cone of sticks, grass, brush, bark, excelsior, etc., and fasten it to the forked stick. Then prepare a pyramid fire ready to set alight. Now take some of your tinder—cotton, say, to stand on a 25-cent piece and about a quarter of an inch thick and place it on the ground. If you are in a dump, put it on a piece of dry wood. Hold the fire in the left hand while you light the stick with the right. Hold the stick at an angle of about 45 degrees, and have the tinder in position to catch the sparks. Now strike the fire with the flint as you get the maximum amount of sparks to alight on the tinder, and as soon as the tinder begins to glow, place it in the kind's nest and gently swing it about until the kind's nest is blazing. Apply this to the pyramid, and, making due allowance for faith, hope and charity, you will, in a very short time, be able to go ahead and cook.

P.L. Harry Hony recently got the fire going in a period of from twenty to twenty-five seconds.

However, kindly note—if you don't get a fire going by this method, use a match—it's quicker.

Mr. J. M. Macdonald left on Friday and will spend part of his Easter holidays in Calgary.

Highways And The Tourist

It requires very little study of figures just published in the National Revenue Review, issued under the authority of the Minister of National Revenue at Ottawa, to convince one in an impressive way of the growing importance of tourist traffic between the United States and Canada.

A little further analysis, however, conveys more than an impression that Eastern Canada and particularly Ontario and Quebec, and in the west British Columbia, are deriving the major portion of the benefits which must accrue from intercommunication in this form and that the prairie provinces are almost left high and dry, for which, of course, there must be reasons.

Without delving too deeply into statistics a glance at a few figures is illuminating, as to the actual facts.

With the intention of visiting the neighboring country to the south for periods up to 90 days, occupants of 30,000 more Canadian automobiles drove into the United States in 1936 than in the previous year. On the other hand 49,000 cars from the United States entered Canada last year. In 1935, a total gain for the combined flow of traffic in both directions of half a million cars in the 12 month period.

In the east, of course, some of the traffic represents little more than daily commuting work and, judging between neighboring cities on either side of the international boundary under 48 hour permits, but even after this type of traffic is eliminated there remains an enormous increase in genuine tourist traffic, and a corresponding increase in revenue. For instance, through the three busiest ports in the Dominion—Windsor coming from Walkerville, Port Erie and Niagara Falls the increase in the number of cars entering Canada in 1936 over 1935 was 100 per cent.

When these figures are pinned against those representing the flow of tourist traffic between the two countries through ports of entry in the prairie provinces a magnifying glass is almost necessary to detect the latter.

To illustrate, the increase in the number of automobiles crossing the boundary through the prairie ports in both directions was only 4,201 as compared with the preceding year and the total flow of tourist traffic north and south through the six principal prairie ports was 42,580 automobiles in 1936 with 22,340 Canadian cars going into the United States and 20,240 American automobiles coming into Canada. In other words, the total movement in both directions through all prairie ports last year was approximately the same as the average increase in tourist traffic in one direction through only one of the busiest ports in the east. In fact, the total movement refers only to tourist traffic in the east under a 90 day permit. Comparison of figures between traffic through British Columbia ports and through the prairie ports is relative with those of the east to a lesser degree.

In addition to the insignificance of the tourist traffic through prairie ports compared with that of the country it is also worthy of note that more Canadian cars are travelling south through prairie ports than American cars of tourists visiting in Canada and that this trend was greater in 1936 than the previous year whereas the situation is reversed in the east. As long as the automobile is more popular than the train, the centres of population in comparatively close proximity to one another on either side of the international boundary, and as long as greater wealth is concentrated in the east than in the west, greater travel to the north and south highways in the east than on those through the prairie ports is to be expected.

But even after making due allowance for these considerations it would appear that the prairie provinces are not making the most of their opportunities and are not attracting as many American tourists to the country as they should. Undoubtedly the principal reason is the condition of the highways in the prairie provinces.

During the past years the cost of improving and maintaining highways in the prairie provinces through a sparsely settled country has been more than in the east. There have been, and still are, many complaints, and as a result residents of the western States prefer to travel on their own highways and there is a tendency for western Canada to ride southward where the highways are more smooth and pleasant.

Until this condition is more popular than the train, the centres of population in comparatively close proximity to one another on either side of the international boundary, and as long as greater wealth is concentrated in the east than in the west, greater travel to the north and south highways in the east than on those through the prairie ports is to be expected. Undoubtedly the principal reason is the condition of the highways in the prairie provinces.

Shipped To Australia

Glant Frugs From New Orleans Being Fattened For Exports

At Orange, New South Wales, half a dozen giant frugs, about 7,000 miles from their native New Orleans, crowded innocently in a frog colony unaware they and their progeny are being fattened for Australian export. The frugs were part of a shipment of 34 sent from the United States to farms at Orange, New South Wales, in 1935. Only 15 of the shipment survived, the others having died of weakness in the hospital. The ship that took them across the Pacific. The frugs were kept in a canvas pool in the ships hospital, given when the weather was hot, and were fed on minced steak.

Avoid For Safety

The National Transport League of Canada announced Transport Minister C. D. Howe had offered a trophy to be awarded for the first fireless ship that took from the coast of the Pacific to the coast of the Atlantic, with a record in connection with railway, waterways and air transportation in the Dominion.

HOW TO OVERCOME ITCHING PILES

If you are annoyed with itching piles or hemorrhoids, do not let it trouble you. It is a common ailment and can be cured. The only safe and reliable remedy is the use of the famous "Pile Cure" which is sold in all drug stores. It is a powerful and effective remedy which is sold in all drug stores. It is a powerful and effective remedy which is sold in all drug stores.

The Philadelphia will shortly have 1,000 postal money order offices one for each municipality.

Detects Diseases Of Heart

Electrical Device Records Vibrations Of Sound and Motion

A device they call it a cardiograph which makes love through the drums in your heart, besides recording any murmurs of that organ, has been invented by G. Hewlett Davis, Detroit, radio engineer and sound expert. The instrument, bearing resemblance to a fancy radio set, was demonstrated here by the Society of Designing Engineers.

The machine, combining design and medicine pictures, as one used for measuring sound and motion and diagnosing ailments of vital organs.

A small delicate crystal, so sensitive it would break into a thousand pieces if placed, even over so gently, on a table, the main cog of the contraption on which Davis holds his patents. Through this crystal and connecting amplifying mechanism, the slightest vibrations of sound or motion are recorded.

The difference in heart beats of a normal man and a man suffering from "mitral stenosis" was demonstrated to the engineers, the machine giving forth varying rhythmic sounds to beats of a to-morrow, while an automatic pencil drew a graph of the vibrations.

Shows Many Changes

Events of Last 25 Years Affect Coronation Program

King George VI's coronation program shows many changes from that of his father, King George V, in 1911.

Radio will enable His Majesty to meet his subjects in a more intimate way than his people throughout the Empire.

The Great War, resulting in the creation of the great leagues of ex-servicemen, brings another change, and at the end of June the King will review a representative gathering of these war veterans.

In 1911 Crystal Palace was the scene of a Festival of Empire and the coronation of the king and queen. Today the Crystal Palace is a ruin, destroyed by fire.

King George V, visited Dublin during his tour of the Empire, and will go to Belfast instead. For King George V, the day before the coronation was a day of intercession. This has been omitted this time.

In 1911 the King and Queen made a "Royal Progress" through London. This year, instead, the coronation procession route itself has been lengthened to allow as many people as possible to see the majestic pageant.

Historic Chairs On Display

Have Been Donated To Bytown Museum At Ottawa

Many chairs used by great men in Canadian history have been donated by descendants to the Bytown Museum at Ottawa. One in French and Simon Fraser, discoverer of the Fraser River, is on display. Another of the same black wood habitant type seen in old farm houses in the Ottawa district dated back to 1827 and was made by Elias Durpee, first settler in Bytown. The only concession to comfort in these chairs is the curve of the back.

A collection includes a chair constructed by an Indian guide of Edward VII. for his son while he was in Canada in 1860 as the Prince of Wales.

Colonel By's favorite chair has a place of honor. It is of black wood with gold-plated design, faded gold figured stain upholstering and casters on the carved feet. A massive chair standing about six feet high, used by successive mayors of Ottawa from 1876 to 1903 shows its years of use in the worn black leather upholstery, faded paint work and chipped appearance of the intricate carving.

Northland Tragedy

Remains of Two Children Found in Athabasca District

Grim northland tragedy that mysteriously claimed lives of two brothers almost five years ago, was believed solved this week with discovery of bones of two children, found near Rock Lake, 40 miles north of Athabasca.

On May 16, 1932, two brothers, aged six and six years old, sons of Nick Tanish, homesteader near Rock Lake, wandered from their home. For more than two weeks an intensive search was conducted in vain.

Sam Daren, settler in the Rock Lake lake area, has discovered the remains of two children lying side by side at the foot of a spruce tree, seven miles from the home. They are believed to be those of the Tanish children.

Germany's machinery industry is booming. 2196

SELECTED RECIPES

PINEAPPLE ICE BOX CAKE

- 1 cup butter
- 2 egg yolks
- 1 tablespoon cream or evaporated milk
- 1 cup drained crushed pineapple
- 1 cup pineapple juice
- 2 egg whites
- 25 Cigarettes Graham Wafers, crumbled

Cream butter and sugar. Beat egg yolks with cream and stir over hot water until thick and smooth. Then add to butter and sugar mixture. Cool. Add crushed pineapple and juice and fold in stiffly beaten egg whites. Line a shallow loaf pan with wax paper and put a layer of graham cracker crumbs in bottom. Over this pour 1/2 of the mixture. Cover with crumbs and more pineapple, continue until all is gone. Cover pan with waxed paper, fasten down with rubber band, and place in refrigerator. Turn upside down on serving dish and serve with whipped cream or whipped evaporated milk. Six portions. Fifteen minutes.

CARAMEL FUDGING

Temperature: 375 degrees F.

- 1 cup brown sugar
- 2 tablespoons shortening
- 1 cup Cream Brand corn syrup
- 1 cup bread flour
- 1 cup Benson's corn starch
- 1 teaspoon baking powder
- 1/2 teaspoon salt
- 1 egg

Cream the shortening; add Cream Brand corn syrup and beat well. Add and beat vigorously. Add bread flour, Benson's corn starch, baking powder and salt; add in place in mixture alternately with the milk. Pour batter in the bottom of a greased baking dish. Cover with caramel sauce and bake in a moderate oven. As the pudding bakes, the cake will rise to the top and the caramel sauce will go to the bottom. One hour.

CARAMEL SAUCE

- 1 1/2 cups sour cream
- 1 cup sugar
- 2 1/2 cups milk
- 1/2 cup brown sugar
- 3 tablespoons Benson's corn starch

Put all ingredients in a bowl and beat vigorously with Dover beater.

Reflecting On History

If The Camera Had Been Known In The Days Of King Alfred

"This photograph," cries the caption, "will be historic." We are accustomed to the phrase. How pleasant, we reflect, our history books would be if the camera had been known since Alfred's day.

Consider the pictures: Dances routed at Ellington; the Dragon banner of the Wessex Kings waving at Stonehenge; John and the Barons on the "Yokel at Runnymede"; Henry the Fifth, his cloak about him, riding through London streets on his return from Agincourt; Henry the Eighth at tennis; perhaps a first performance at the Globe on Bankside.

Then imagine the groups: Queen Elizabeth, the Earl of Leicester and Queen Elizabeth; the Five Members (reading from L to R); the Cabal in conference.

The camera, used in time, might have solved some of the permanent guesses of the historian. Did Canute command the waves? What did Raleigh do with his cloak? "Memorable photographs indeed!" in the word that "1066 and All That" has made us chary of using. —London Morning Post.

Spelling Match

Shows University Graduates To Be Shockingly Poor Spellers

In an age when proper diction and clear enunciation of the English language are submerged in a flood of coined words and colloquialisms, a revival of the old-fashioned spelling seems anomalous. A series of spelling contests are now being aired over the radio where, we always believed, spelling of a word really mattered very little if it was clearly and correctly pronounced.

The speaking vocabulary of the average American is estimated to be between three and four hundred words, most of them of two and three syllable construction. Simple words like "believe," "saw," and "occurred" are a problem for most of us. Confronted with such stumbling blocks as "phibius," "anafoleth," "perutynoph" and "pittinium," we would be inclined to doubt the existence of any such word in the American language. What confuses us is the broadcasting of the fact that the majority of Americans, holding university and college degrees, are surprisingly intelligent and well-read, are shockingly poor spellers.

So it seems to us that the radio spelling bee is an attempt to revive an art that has long ago outlived its usefulness. —San Francisco Journal.

Along Canada's Mining Highway

Quebec supplied most important news during the past week. The Quebec Manitou project, better known as the Golden Manitou, opened a new high-grade gold mine in diamond drilling. It has been known that the contact that appears to be responsible for the large orebodies on the Languette continued easterly through the Golden Manitou and Piening projects. The finding of the wide vein containing the above-mentioned high-grade sulphide further points the way to a major mining development.

Ontario's Martin Hill property, located a few miles to the west of the Quebec boundary, supplied other important news. The finding of high-grade ore on the first level well added importantly to an already impressive large tonnage mine development.

The proving of a new oil field by the Plains Petroleum Company by the bringing in of a producing well on the company's 6000 acre tract located thirty miles east of Lethbridge and eighty miles south-east of Turner Valley is a development of probable far-reaching importance.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh, delicious! Para-Sani keeps them from staling. Get Para-Sani in the bank, a sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

TOWN & COUNTY
Personalographs

Mr. Otto Martin and Miss Mary
Curry left on Thursday last for a
trip to the coast.

Mr. K. Hodgson of Dorothy spent
a few days in Carbon last week visit-
ing with her brother-in-law and sis-
ter, Dr. and Mrs. G.L. McFarlane.

Miss Annabelle Ramsay arrived on
Thursday and spent a few days in
town, prior to leaving for Trail, B.C.,
where she has secured a position in
a hospital.

Charlie, Dismore, who has resided
at Vermen, B.C. for the past few
months, was a Carbon visitor last
Wednesday.

Miss Hester M. Bell, of the Carbon
public school staff, left on Thursday
and spent part of the holidays at her
home in Grangely.

Born to Mr. and Mrs. Verling
Moorehouse, on Sunday, March 28th, a
daughter.

Born to Mr. and Mrs. J. Hoff, on
Saturday, March 27, a daughter.

Mrs. Ramsay and daughter, Mabel,
are Calgary visitors this week, going
in on Monday.

Mr. and Mrs. C. H. Smith were Cal-
gary visitors on Monday of this week.

A large crowd of Carbonites went
to Drumheller on Sunday to view the
remains of the disasterous fire.

Mr. and Mrs. H.R. Davidson spent
the week end in Carbon and left Mon-
day to spend a few days with Mr. and
Mrs. H. Davidson of the Ghost Pine
District.

Mr. and Mrs. E. Sellens left on
Monday to make their home in Ed-
monton.

Norman Nash and Miss Helen Ma-

thers motored to Calgary on Saturday
and brought back Mr. Edie Silens,
who spent the week end at the home
of Mr. and Mrs. C. H. Nash.

John Atkinson Sr. is a Calgary vis-
itor this week.

Percy Edwards, Mrs. McQuade and
Betty, Mrs. H.L. Brown and Martha
Rogers motored to Calgary on Tues-
day.

Sammy Malton is spending his Eas-
ter vacation in Carbon at the home
of Mr. and Mrs. H.C. Wilson.

Mr. and Mrs. Hugo Helvig left last
week for Calgary and will go on to
their home near Oids.

Leon Ohlhauser and Art Bierick
who have been attending technical
school in Calgary this winter, arrived
home on Thursday.

Mr. and Mrs. J.H. Olliphant, Myrtle
and Bill took in the week-end hockey
games in Calgary between North Bat-
deford and Fort William.

Mrs. Norman Shaw of Calgary, who
has been visiting with her sister, Mrs.
D. Twiss, returned to her home in Cal-
gary on Wednesday.

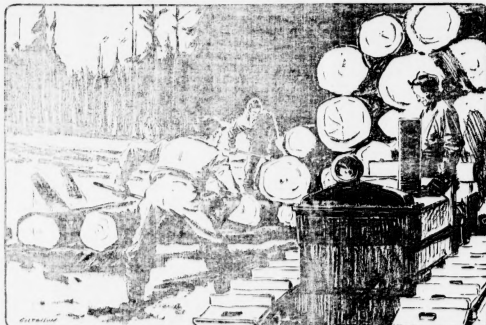

Wm. Downe Jr. is back home after
a term spent at Calgary technical
school.

Miss K. Roth was a week-end visitor
in Calgary.

Miss Joyce Leing, who has been at-
tending Normal School in Calgary, is
home for the Easter vacation.

"Chick" McCurdy had the misfor-
tune to lose the thumb on his right
hand last Saturday while struggling
with a log at the Olliphant mine. The thumb
was so badly mangled that it had to
be amputated at the first joint. Dr.
McFarlane performing the operation.

CANADIANS AND THEIR INDUSTRIES...AND THEIR BANK

THE FOREST INDUSTRIES

The forest area of Canada on which there is timber
of merchantable size is larger than the total area of France
and Germany combined, the standing timber on this is
estimated at 274 billion cubic feet. An area of even
greater extent is covered with young growth.

The vast reservoir of wood in the source from which
Canada drew wealth in excess of \$10,000,000 in 1934
(the last figure available) in the form of primary
products such as:

- raw materials for saw-mills, pulp mills, wood distilla-
tion, charcoal plants;
- logs, pulpwood bolts, etc. for export;
- firewood, railroad ties, posts, poles, fence rails, mining
timbers;
- maple sugar, balsam gum, resin, casahuate, tanbark,
moss, etc.

The total value of manufactured products made princi-
pally from raw materials of forest origin was \$104,435,948.
Forests produced in 1936 afforded an excess of exports
over imports—\$13,560,000—very important to Canada's
international trade.

The Bank of Montreal has co-operated with every activ-
ity of the forest industries—assisting in every phase of
production and marketing. The Bank has had the privi-
lege of financing a large share of the export business of
these industries. Thousands of workers are dependent
on the safety and facilities of the Bank with their
employing companies.

Some of the Bank's services most frequently used by em-
ployers and employees in the forest trades: Commercial
accounts, foreign currency accounts, financing of shipments,
commercial loans and discounts, collections, trade and credit
information, safeguarding of securities, savings accounts, per-
sonal loans, money orders, travelers cheques, banking by mail.

PROVINCIAL NEWS NOTES

The breach in the Social Credit
party was temporarily closed on Tues-
day when the budget was suspended
and supply of approximately five mil-
lion dollars was voted to carry on
administration of provincial affairs.

Aiming to establish Social Credit
in this province at an early date and
to have control of same under a com-
mission of five, apart from all polit-
ical interference, Premier William
Aberhart on Tuesday introduced into
the legislature the government's So-
cial Credit bill, as an amending mea-
sure to the Social Credit Measures Act.
Jesse Gouge announced recently
that drilling would commence early
this spring near Drumheller in an at-
tempt to find oil. A syndicate has
been formed and an attempt will be
made to raise funds to commence op-
erations.

Miss Campbell, teacher of Garrett
school, left on Thursday for Calgary.

"Somebody
to see you!"

IF EVERYBODY with something to interest you
should come and ring your bell, what a nuisance
it would be. Think of the swarming, jostling crowd,
the stamping of feet on your porch and carpet!

Every week we know of many callers who come
to see you. They never jangle the bell—they don't
take up your whole day trying to get your attention.
Instead, they do it in a way that is most considerate
of your privacy and your convenience. They adver-
tise in your newspaper!

In this way you have only to listen to those you
know at a glance have something that interests you.
They make it short, too, so you can rather quickly
just what you want to know. You can receive and
hear them all without noise or confusion in a very
few minutes.

In fairness to yourself look over all the adver-
tisements. The smallest and the largest—you never
can be sure which one will tell something you really
want to know.

Think what this won-
derful offer will mean
in enjoyment through-
out the whole year for
yourself and your fam-
ily. Magazines of your own choice and
this newspaper, packed with stories, tim-
ely articles, helpful departments and col-
orful illustrations. Now is your chance.
